Felipe Reducino

Frontend Software Engineer | React.js | Next.js | Stencil.js |
Typescript
São Paulo, São Paulo, Brazil

Summary

As a front-end software engineer, I had the opportunity to work on building e-commerce, fintech, backoffice, market place and design system. My expertise lies in building exceptional user interfaces and seamless user experiences using technologies like React (.js and native), Next.js, JavaScript, TypeScript, and modern CSS frameworks.

In my current job at Fretebras, our mobile app has more than 1 million downloads (https://play.google.com/store/apps/details?id=br.lgfelicio&hl=pt_BR) and the marketplace platform handled more than R\$18 billion in freight in 2022 (<https://www.fretebras.com.br/>).

Hard skills:

React.js | Next.js | Stencil.js | JavaScript | TypeScript | Docker |
Kubernetes | Grafana | Prometheus | Jest | E2E tests | Styled-
components | Tailwind | SASS

Experience

Fretebras

2 years 4 months

Frontend Software Engineer | Design System

February 2024 - Present (11 months)

São Paulo, Brazil

Responsible for creating Web Components using Stencil.js. Collaborated with the Design System team to develop and distribute design system libraries via private npm, delivering the best product with the highest fidelity, maximum quality, and performance.

- Main technologies used: Javascript · Typescript · Stencil.js · Sass · Docker ·
Kubernetes · Grafana · Prometheus · GitLab-CI.

Frontend Software Engineer

September 2022 - February 2024 (1 year 6 months)

São Paulo, Brasil

As a frontend software engineer, I worked on projects like a marketplace system (micro frontend with module federation), backoffice, and Internet banking website. I collaborated with cross-functional teams to design and develop user-friendly, responsive interfaces, ensuring high quality, performance, and security.

- Main technologies used: Javascript • Typescript • React.js • Next.js • Axios
• API Rest • Jest • Styled-components • Docker • Kubernetes • GitLab-CI • Grafana • Prometheus.

Opah IT

Frontend Developer

April 2021 - August 2022 (1 year 5 months)

São Paulo, Brasil

As a Software Consultant at Opah IT Consulting, I specialized in delivering customized software solutions for clients in the banking sector, leveraging both ReactJS for web development and React Native for mobile applications. I collaborated closely with clients to understand their needs, conducted thorough analyses of requirements, and developed innovative solutions. Working alongside cross-functional teams, I ensured the successful implementation and integration of software systems, ultimately assisting clients in achieving their business objectives.

PurpleTech

Frontend Developer

January 2019 - April 2021 (2 years 4 months)

I specialized in developing a white label platform for the e-commerce industry, gaining extensive experience in this field. My responsibilities included designing and implementing customized solutions to meet client needs, ensuring high-quality performance and security standards were met.
